01 PROFILE

Hello! My name is Youssef, and I'm a passionate front-end developer with one year of experience specializing in Angular. I've had the opportunity to work on a range of projects, including full websites and landing pages, with a strong focus on creating visually appealing designs and smooth user experiences. My first client project, "Hatha-Alislam," highlighted my attention to detail in styling, color matching, and user-friendly interfaces.

I'm always eager to learn, staying up-to-date with the latest trends in front-end development by reading news about new features and taking courses. I have a particular interest in diving deeper into Angular, mastering RxJS, and improving my skills in deployment, UI/UX, and Figma. My goal is to become highly skilled in front-end development, continually evolving my approach to deliver unique and polished results.
